Curriculum Development

During 2007-2008 I have created two new courses. Presently, they are under review at the Graduate Council. They are:

International Trade (will be taught fall2008)

Economics for International Development (will be taught spring 2009)

I have developed 20 new courses since last promotion.

The test of hypothesis of the equality of the results of the students' evaluation for my classes versus the USM average is rejected with type I errors as low as .02 in favor of the alternative hypothesis that my students' evaluations are superior. For detail please refer to the teaching portfolio, 1998.

Educational Innovation and Technology:

(Some documents were lost during hurricane Katrina)

In 2008:

Attended workshop on Camtasia Studio 5

Converted courses to Camtasia Studio 5

Presented to QEP July 2008.

In 2007:

1. Converted one course to Wimba format
2. Atended: Finding a Voice: Improving Oral and Written Competencies, Fellows Seminar. This is a training to augment writing component of courses.
3. Enrolled in Programing with STATA. STATA is a sophisticated statistical package that is required for research and teaching in IDV Ph.D. Program.
4. Introduction to STATA. STATA is a sophisticated statistical package that is required for research and teaching in IDV Ph.D. Program.

In 2004

1. Post-Calculus Probability and Statistics Courses Workshop, University of Alabama in Huntsville, AL, July 14-16, 2004. The seminar provides new methods of incorporating probability theory in research and improved teaching techniques.

In 2001

1. Introduction to ArcView GIS, CRMP, Biloxi, MS, February 22-23, 2001.
2. Population of America Conference, Washington, D.C., March 28-31, 2001.

In 1999:

Hypertext Statistics. Hypertext-based statistics course for introductory statistics. Hattiesburg, Mississippi: University of Southern Mississippi Press, 1999.

In 1998:

Created a three dimensional model using historical data on ages and heights of children. It represents a study that has more than 13,000 pairs of observations. It is used to demonstrate frequency, descriptive statistics, probability, conditional probability, normal distribution function, the Central Limit Theorem, confidence interval, test of hypothesis, regression, influential points, and outliers. The model demonstrates statistical concepts in a tangible form.

Incorporated pretest-posttest in my classes.

In 1996:

Created a Web page to facilitate communication with students and provide them with handouts and course materials.

Incorporated cooperative education in my courses.

In 1995:

Used writing to learn concepts and methods in all courses during the summer and fall semesters.

Incorporated peer tutoring in MIS 320 in Spring 1995 on both Hattiesburg and Gulf Park campuses.

Required a term paper for all statistics courses.

In 1994:

Quattro Pro V. 5.0. Hattiesburg, Mississippi: University of Southern Mississippi Press, 1994. The book, which provides cross-reference to versions 4.0 and 3.0, consists of text, examples, cases, exercises, questions, and projects, among other things. The book also includes eight chapters on RBase. Extensive handouts are provided on DOS, Unix and solutions to homework and other problems.

Incorporated the use of Excel software in classroom as well as making software use

an integral part of the course.

Created PowerPoint slides on different aspects of statistics. Used the slide show to demonstrate difficult subjects and also to review before each exam.

Provided notes and handouts on writing techniques and styles.

Added more subjects to the historical development of statistics. Noticed a substantial increase in the term papers using the subject of Poisson distribution after demonstrating its historical background.

In 1990:

YStat A User's Guide, Hattiesburg, Mississippi: University of Southern Mississippi Press 1990.
