

## **APPENDIX A**

### **ANTIBODY PRODUCTION**

1. What antigen(s) will be used?
2. What adjuvant(s) will be used?
  - a. for the initial immunization
  - b. for subsequent immunization(s)
3. What site(s) will be used for immunizations?
4. What route(s) will be used for immunizations?
5. What volume, including total and per site, of antigen/adjuvant will be injected?
6. How frequently will immunizations be administered?
7. What methods will be used to collect blood and/or tissues? If anesthesia will be required, list the agent(s), dose(s), and route(s) of administration.
8. How frequently will blood be collected and what will be the maximum number of collections per animal?
9. What is the maximum volume of blood (per kg of body weight) that will be collected per time point?
