

Bayer Distinguished Lectureship Series

2002 Prof Alan J. Russell University of Pittsburgh
"Exploring the Interface between Materials and Biotechnology"

2007 Prof Byron Pipes
Purdue University
"From Metals to Polymers: The Coming Transition of the Aerospace Industry"

2003 Dr. Eric J. Amis NIST
"Exploiting the Innovator's Dilemma: New Paradigms in Polymer Science"

2008 Prof Eric Baer
Case Western
"Layered Polymeric Systems by Forced Assembly"

2004 Prof Paula T. Hammond MIT
"Controlled Construction of Thin Film Nano-assemblies: New Explorations of Polymer Multilayer Coatings"

2009 Prof Adi Eisenberg
Otto Maass Professor of Chemistry
McGill University
"Block Copolymer Vesicles"

2005 Prof Kristi S Anseth
University of Colorado
"Photopolymerized Hydrogels as Niches to Promote Tissue Regeneration"

2006 Prof Joachim Kohn
Rutgers University
"Combinatorial Approaches to Biomaterials Design Accelerate The Development of New Medical Implants"
