

SSCT Polymer Science Seminar Series 2008 – 2009

- October 1, 2008 Dr. A. Griffin, Professor and Chair, School of Polymer, Textile & Fiber Engineering
Georgia Institute of Technology, Atlanta GA
"Liquid Crystalline Elastomers: Structure and Mechanical Properties"
- October 8, 2008 Dr. D. Loy, Professor, Departments of Material Science & Engineering and Chemistry
University of Arizona, AZ
"Polyarylene, silica-Nafion, and sol-gel derived polymer electrolytes"
- November 5, 2008 Dr. R Weiss, United Technologies Professor of Advanced Materials and Processing and a Board of Trustees Professor
University of Connecticut, Storrs, CT
"Ionomers: They are not just for golf balls anymore"
- November 19, 2008 Dr. C. Cornelius, Associate Professor, Department of Chemical Engineering
Virginia Polytechnic Institute and State University, Blacksburg, VA
"Selective Ion Transport within Functionalized Polymers"
- December 3, 2008 Dr. K. Beers
Polymer Division National Institute of Standards and Technology
"High Throughput Approaches to Polymer Science using Microreactor Technology"
- January 21, 2009 Dr. K. Miller
SABIC Innovative Plastics
"Sustainable Development Strategies for Polymers"
- January 28, 2009 Dr. C. Weder, Professor, Department of Macro Molecular Science & Engineering
Case Western University
"Noncovalent Interactions as a Design Tool for Functional Polymers"
- February 4, 2009 Dr. K. S. Bisht, Professor, Department of Chemistry
University of South Florida, Tampa, FL
"Biocompatible Polymers – Synthesis and Property Modulations"
- April 1, 2009 Dr. Robert K. Prud'homme, Chemical Engineering
Princeton University
"Next Generation Nano Carriers for Multifunctional Drug Delivery, Imaging, and Targeting- How do we make them?"
- April 8, 2009 Dr. Kirt Page
National Institute of Standards and Technology
TBD

Many thanks to our sponsors who have made our Seminar Series possible!
Southern Society for Coatings Technology
Eastman Chemical Company
