

HIDE-AND-SEEK LEARNING

This educational hide-and-seeK game will help children with critical thinking skills and developing questions.

INSTRUCTIONS:

1. Gather five common items from around the house. (ex: shoes, office supplies, accessories, kitchen utensils.)
2. Hide one of the items.
3. Allow your child(ren) to search for the item.
4. Seekers can ask up to five questions about the objects location, but the answer can only be “yes” or “no”. If needed, help your child in developing the proper questions for the yes or no answer.
5. Once the object is found, the finder gets to hide the next item and answer the questions. The parent being the seeker will allow the child to better understand how to frame their questions.

To make this game further educational, you can ask your child to use five adjectives to describe the item once it is found.
