

Applicant 5-year Requirement Waiver Request

Waiver Requirements and Instruction

Applicants must have taken the Human Anatomy, Human Physiology and Microbiology pre-requisites within 5 years of their projected enrollment date. For the current application cycle, any course that is taken during the fall of 2020 or later would meet the 5-year requirement.

Applicants who took these courses outside of the 5-year limit (prior to the Fall 2020 term) must complete a waiver demonstrating how they are currently applying the knowledge attained from these courses either in their work or in their studies.

Waivers are reviewed by the Physician Assistant Program Admissions Committee. The committee will consider waivers from applicants for courses that are up to 10 years old. The Committee may request an official copy of the course syllabus, and the waiver request may be denied if it cannot be provided.

Complete the section below for the course(s) you are requesting a requirement waiver for.

Prerequisite requirement: Human Anatomy

Name and course number of completed course:

Institution name:

Date Completed:

Course Grade:

Rationale: Explain in the box below how you are currently applying the knowledge attained from this course in your current employment or studies.

Applicant 5-year Requirement Waiver Request
