Office/School:	# Requestor's School
Position:	Interim School Director

Please provide a very detailed description of the information you are requesting. Include a list of fields/data that you need. Please include selection criteria such as campus and academic career. :

Request 1:

Query request is for Gulf Park and HBG students enrolled in Requestor's School name and code undergraduate program. Request is features (columns) that include:

1.) Unique Student ID - anonymized
2.) Major - Academic Career
3.) Fr/Sophomore/Jun/Senior
4.) Calendar Year
5.) Semester
6.) Course prefix and number
7.) GEC or not GEC? - if GEC, then specify GEC 01, GEC 02... GEC 09, if DEG specify if DEG 01 or DEG 02
8.) Campus of residence HBG, GP
9.) Did the student Graduate Y/N
10.) Grade
11.) time and day the class was offered

I understand and request that for each student (1., 2, 3), located at GP and HBG in school code we will have every class they have taken for the year and semester (4,5,6,7) and each of these will have information about the students grade (10). Finally, a column of if they received their degree (9).

Request 2:

Query request is for Gulf Park course offering for undergraduate programs (GEC and school code . Request is features (columns) that include:

1.) Year
2.) Semester
3.) Course prefix and number
4.) GEC or not GEC?
5.) time and day the class was offered

Please provide the semesters (or academic years) of data you are requesting. :

Fall 2021 to Spring 2024 for both request 1 and 2.

What is the purpose of your data request? What is the question you are trying to answer by obtaining this data?:

Request 1:

We are interested in the number of GEC and non-GEC courses that are taken online/virtual/hybrid vs. in-person for our school's majors at both campuses - at the level of the student. We will create frequency histograms of the number of courses that are taken in-person vs. not in person for students, grouped by major, year, campus. We hypothesize that GP students are taking many of their courses online.

Request 2:

These data will be used and merged with the data from request 1 to understand if an in-person option was available or if the student chose to take online - the course day and class and the GEC ## will allow us to make this merge.

Fundamentally we are looking to make major changes (potentially) to the way we deliver programs in our School. I hypothesize that the data will indicate that: students are unable to get GEC courses on the coast to fit their schedules, they are taking non in-person courses more frequently, and the outcomes are not as good (as evidenced by grades and graduation).

This information will help inform our decision of whether to move our course disciplines courses to a 2+2 model, with the first two years in HBG.

Very grateful for any help you can provide, best, Name

Is this data request for research purposes (i.e. thesis, dissertation, publication, etc.)?:

No

Is this data request for accreditation purposes?:

No
