Buyer, Procurement, and Contract Services

1. Total of 300kg to be delivered in 3, 100kg shipments.
  - a. Packaging size and material?
    - i. We currently receive the material in high pressure cylinders @ 45kgs. The material has a low boiling point (46C) and is classified as an inhalation hazard. We are not partial to any type of container as long as it is rated to handle the material safely. We can discuss specific details of the containers later if you have various options. A net packaging size should be 50kgs or less at this point.
2. 98% purity
  - a. Any impurity requirements or specifics otherwise?
    - i. 98% or higher is fine as far as impurities go...no known specifics with impurities at this point.
3. Can you share the intended application?
  - i. Industrial chemical synthesis
