Buyer, Procurement, and Contract Services

1. Could you provide additional technical details regarding the current infrastructure and software stack?

Specifically, we would appreciate information on:

- The number of firewalls, endpoints, and any other relevant hardware considerations.

- Details of the current security stack and the specific software applications currently in use.

- a. This is for monitoring a Microsoft Defender security stack with an A5 license. There are currently no firewalls in scope. The pricing should be based on active users rather than device count. However, we have approximately 3,000 endpoints in scope.
