SAVE THE DATE - INDUSTRY SUMMIT MAY 17

You're invited! Come participate at the 2012 Industry Summit on May 17 on the MS Gulf Coast. Please save the date. More information coming soon.

CENTER STRENGTHENS TIES WITH PANAMIANIAN LOGISTICS & TRANSPORTATION SECTOR

Tulio Subbarao, MD Sander, and Chad Miller from the Center for Logistics, Trade, and Transportation (CLTT) at the University of Southern Mississippi were invited to Panama to continue strengthening relationships with the Universidad Iartima de Panama (UNIP) and representatives of the Logistics and Transportation Industry in Panama. The trip was sponsored by SENACYT, which is the Panamanian equivalent of the National Science Foundation (NSF), as part of a national effort to improve the country’s transportation and logistics workforce. In addition to the sponsorship of SENACYT, this collaboration was possible due to a Memorandum of Understanding with UNIP signed by Southern Miss President Martha Saunders in 2009.

CENTER LINKS STUDENTS WITH INDUSTRY AT MODEX 2012

The Center for Logistics, Trade and Transportation (CLTT) at Southern Miss continues to emphasize the importance of linking students with the industry. CLTT’s participation in the MODEX 2012 provided a unique opportunity for the students to create a new connection with the real-world implementations. MODEX 2012 showcased a variety of latest tools and techniques of warehousing and logistics distribution at the show. It is the industry's newest expo for the manufacturing, distribution and supply chain industries.

WIRELESS POWER COULD REVOLUTIONIZE HIGHWAY TRANSPORTATION

A Stanford University research team has designed a high-efficiency charging system that uses magnetic fields to wirelessly transmit large electric currents between metal coils placed several feet apart. The long-term goal of the research is to develop an all-electric highway that wirelessly charges cars and trucks as they cruise down the road. This new technology has the potential to dramatically increase the driving range of electric vehicles and eventually transform highway travel, according to the researchers. Their results are published in the journal Applied Physics Letters.

GULF COAST TRADE ALLIANCE ANNUAL EXPORT CONFERENCE

April 10-12, 2012
Beau Rivage Resort
Biloxi, MS
$250

Export Resources and New Market Opportunities for Small Business

Partners:
MS World Trade Center
U.S. Small Business Administration
MS Development Authority

Registration deadline: April 5, 2012.

Company Spotlight
