CLTT STUDENTS WIN THIRD PLACE IN FREIGHT COMPETITION

Students from the University of Southern Mississippi's College of Science and Engineering and Transportation and Logistics Management program won third place at the National University Transportation Competition (NUTC).

Dr. Soledad and Dr. Bathiste took the students to the national competition in Atlanta, where they were able to showcase their skills in freight transportation.

In the competition, students were tasked with creating a comprehensive plan for freight transportation, including logistics, supply chain management, and cost analysis.

The competition is an opportunity for students to apply their knowledge and develop skills that are essential in the transportation and logistics industry.

INTO THE WILD: INTERVIEW WITH REGEN FRENCH

You may not have heard much about the role of military supplies in the global economy, but it's an area receiving serious attention from the U.S. military.

Regen French is the director of the Global Supply Chain Management Program at the University of Southern Mississippi. He recently spoke to us about the importance of military logistics and the challenges faced by the industry.

TRANSPORTATION OF HAZARDOUS MATERIALS DESERVES SERIOUS CONSIDERATION

According to the U.S. Department of Transportation (USDOT), hazardous materials are defined as any material capable of posing a risk to people, property, or the environment. The transportation of hazardous materials is a complex and challenging task that requires careful planning and execution.

Transporting hazardous materials is not only regulated by the USDOT, but also by other federal, state, and local agencies. Companies must comply with strict regulations and guidelines to ensure the safe transport of hazardous materials.

Transporting hazardous materials requires specialized equipment, training, and expertise. Companies handling hazardous materials must ensure that they have the necessary resources and expertise to handle these materials safely.
