Searching for Classes in SOAR

Searching for Open **AND** Closed Classes

SOAR searches for only open classes by default. On the class search panel, be sure to uncheck the “Show Open Classes Only” checkbox after you’ve entered your search criteria.

Knowing which classes are closed is helpful because it allows students to see all class offerings. Just because a class search returns no results, doesn’t necessarily mean the class isn’t offered – it may just be closed.

**TIP:** Student may enroll in closed classes only if they have permission from the professor who teaches the closed section.

Searching for 8wk1, 8wk2, and Mini Session Classes

You can refine your search on the SOAR class search panel by selecting a specific “Session” via the drop-down menu.

Looking for just mini session classes or 8-week-two sections? No problem!

If no results are found, remember to also uncheck the “Show Open Classes Only” checkbox to see even closed sections.
Searching for Classes in SOAR

Searching by Subject

Need to find all classes available in a certain subject area? It’s easy!

On the SOAR class search panel, enter only the course subject to see all available courses.

If no results are found, remember to also uncheck the “Show Open Classes Only” checkbox to see even closed sections.

**TIP:** Modify your search and change your “Campus” selection to see online and face-to-face courses.
