Inspiration Software is an essential tool for visualizing, thinking, organizing and learning through concept mapping. Educators use Inspiration to customize instruction, achieve standards, assess student projects and energize learning. Inspiration helps organize information, develop thinking skills and demonstrate knowledge. Drag-and-drop actions and hyperlinks make it easy to gather research and connect to files and web resources.

Date: Thursday, July 13th

Time: 10:00-12:00

The University of
Southern Mississippi
McLemore Hall, Room 155
