

How to use the technology in room 166

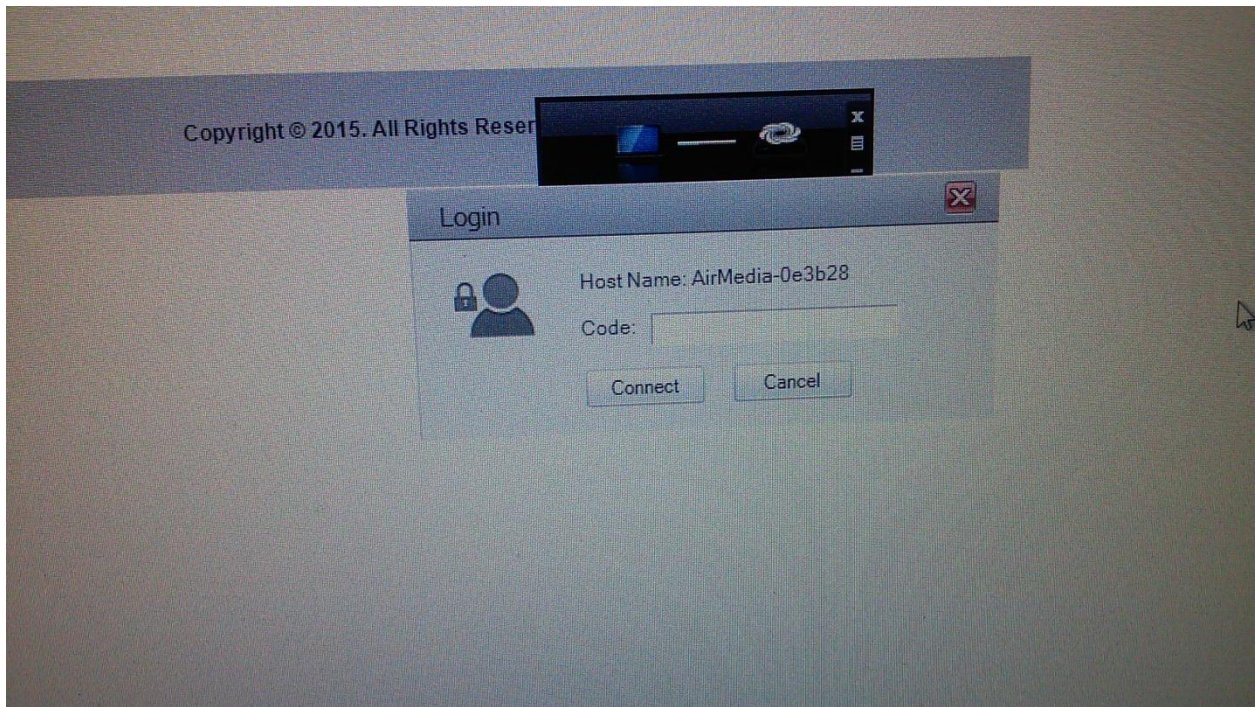

1. Turn projector on with the power button on the remote. Once on, you will see a screen pictured below.

2. With your laptop, open up a web browser (Internet Explorer, Firefox, Chrome). Type in the IP address seen on the screen in your web address box (for example: 131.95.100.3). You will be directed to the website below.

3. Choose one of the Download buttons. If you have Windows, choose "Client for Windows". If you have a Mac, choose "Client for Mac". Once you finished the download, open the file. It will install the client. You will get the box pictured below.

4. Type in the code number that you see on the top right hand corner of the projected image on the projector screen. Hit the Connect button. Your laptop image will display on the screen.
